Bachelor's degree in computer science with a specialization in robotics and programming

Mendoza, AR
03/2018 – 12/2022

Experience

Freelance Project: Mountain Company Website Remote

Capital, Mendoza
06/2025 – Present

- Designed and developed a responsive, modern web application for a company focused on mountaineering and adventure tourism.
- Built sections including an image gallery, informational pages, trip calendar, and contact channel to enhance user engagement and accessibility.
- Used Astro framework with JavaScript, TypeScript, and Tailwind CSS to ensure performance, maintainability, and modern frontend architecture.
- Prioritized scalability and clean component architecture to facilitate future expansions and admin functionalities.
- Ensured accessibility and mobile-first design to reach a broader audience effectively.
